Matthieu Moreau-Le Breton

Actuary – ALM & Financial Risk Management – Sustainability & ESG

Profile

Qualified actuary, specialized in financial risk management, pension & savings actuarial science, and ESG data. Experienced in ALM modeling, market risk analysis, and automation of extra-financial data extraction. Rigorous, analytical, and open-minded, I aim to contribute to projects combining quantitative expertise, sustainable finance, and innovation in risk management.

Experience

01/2025-07/2025
EY - Paris
Life Actuarial Consultant

- Performed life insurance and financial modeling projects in EY's Actuarial Practice, utilizing advanced Excel and VBA for analysis and reporting.

06/2023-09/2024
Prim'Act - Paris
Actuarial Consultant

- Certification assignments and monitoring of mortality tables.
- Work on the impact of climate change in insurance.
- Thesis on liquidity risk: proposed a new liquidity indicator (article to be published in BMI journal in December).

06/2020-07/2020
Paris Saclay University
Research Assistant

- Modeling of stochastic processes with Python: random walks, Galton-Watson processes, autoregressive processes

Projects

07-2025-08/2025

"Transparence ESG CAC 40" Project

- Developed a scoring system for CAC 40 companies evaluating ESG and CSR reporting quality, using web scraping and Python automation.
